

TO WHOM SO EVER IT MAY CONCERN

We have been using Right2Vote platform for the last one month and find it very useful. In our business it's always a challenge to get market information from wholesalers and retailers which is timely and at the same time actionable.

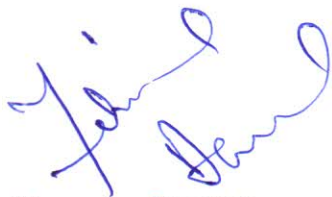

Right2Vote has allowed us to collect opinion and feedback from our retailers and wholesalers in a very timely and organized manner.

We specially like the feature of closed group polls where we can select from whom we want the opinion/feedback, send direct invite to their mobile phones and get results on real time basis .The detailed result feature where we can see who has responded has also been very useful.

Right2Vote platform is very simple, user-friendly and at the same time very effective. We intend to use the platform more extensively going forward and we wish the Right2Vote team best of luck in their endeavours.

Ichiban Crop Science Ltd. Is a company engaged in manufacturing and marketing of Agro-Chemical products and has about 100 products choice for its customers.

Despite the fact that it is only a year old, it has a nationwide presence with over 1200 distributors and expanding with a turnover in excess of Rs 100 crores. Ichiban owes its growth to strong belief in fair business practices and the experience it gained from its association with HPM crop science limited which is a 40 year veteran in marketing of Agro-Chemicals.
